Summary

I am Jimmy, a senior Web&Mobile app developer who are extremely specialized in JavaScript/Typescript engineering.

I have delivered scalable and robust projects for businesses and startups quickly with prototypes and ideas. Projects I have worked on include big applications with complex functionality that thousands of users used and liked. Over a decade of career keeps me high priority on customer satisfaction, easy going and comfortable in agile environments.

Skills

- Angular, React, PHP, Nodejs, React Native, HTML5/CSS3, Bootstrap
- Firebase, AWS, MYSQL, MongoDB
- Agile Methodologies, CI/CD Pipeline, Git, Test Driven Development, Object-Oriented Programming (OOP)

Work History

Full Stack Engineer (Softite LLC)

May 2020 - Sep 2021 (1 years +)

Technologies: Angular, Firebase, CI/CD Scrum, Docker, Express.js, Algolia/Elastic search, GCP.

Contributed to a fleet management project that facilitates operations between fleet owner companies and maintenance companies.

Wrote unit and end-to-end tests using Jest to ensure that the APIs are working as expected.

Supported making the CI/CD pipeline work properly with the codebase.

Helped create database models, relationships, and extensions.

Remote Support Engineer (Self-employed)

Jan 2020 – Apr 2020 (3 months +)

Looking for a remote & long-term opportunity.

Learning up-to-date technologies.

Team Leader (Self-employed)

Jun 2019 - Dec 2019 (7 months)

Technologies: Vue js, Node js, MongoDB, React Native, Ionic, Angular, Sendgrid, Twilio, Google Map, Payment, Push Notification.

Led the technical team to develop, test, and deploy web, Android, and iOS applications through the Agile development process.

Reduced development effort by 25% by re-architecting the product using 100% JavaScript (Vue js, Node.js, React, Angular, Ionic and React Native), where every engineer is a full-stack one and can work on any portion of the system.

Managed the product from idea to launch of Android, iOS, and web apps in three months

Senior Frontend Developer (Nextbrain)

May 2014 - Jan 2019 (4 years 9 months)

Technologies: React, Redux, Hooks, Context API, Thunk, Saga, Angular, Ionic, RxJS, NgRX, Vue, Vuex, Axios, Mobx, Firebase

Contribution of architecting for booking, social, shopping, healthcare.

Refactored legacy code while simultaneously creating new features and pages using React Hooks Implemented workflows and guidelines for code consistency, readability, maintainability, and testability of LMS.

Used Angular 8/9 to build booking web applications with NgRX, RxJS.

Built an auction admin using Vue js, Vuex, Tailwind CSS, Nuxt with firebase authentication, real time chat and user management
